

Know What Is The Purpose Of The ISOO CUI Registry

The government's online archive for CUI policy and practice at the federal level is the [what is the purpose of the isoo cui registry](#). The ISOO CUI Registry is open to all personnel, including those who work for contractors and the military.

the subset of CUI for which no clear handling or distribution restrictions are laid out in the relevant statute, regulation, or national policy.

The Controlled Unclassified Information (CUI) Executive Agent (EA) is the National Archives and Records Administration (NARA). The CUI Program is administered by NARA on behalf of the whole federal government. Keep reading to know more about **what is the purpose of the isoo cui registry**.

What is CUI?

A law, regulation, or government-wide policy may require or permit an agency to handle using safeguarding or dissemination controls information that the government creates or possesses, or that a company develops or owns on the government's behalf. This type of information is known as controlled unclassified information (CUI). You must know about it regarding **what is the purpose of the isoo cui registry**.

CUI does not, however, comprise classified information or data that a non-executive branch business owns and keeps on hand in its own systems and that was not obtained from, developed by, or acquired by, or on behalf of, an executive branch agency or a company operating on the agency's behalf.

There are three ways that law, regulation, or government policy may require or permit safeguarding or dissemination controls: by requiring or allowing agencies to control or protect the information without providing any specific controls, which makes the information CUI Basic. Continue reading to understand **what is the purpose of the isoo cui registry**.

Purpose of the CUI Program

While the information produced, used, stored, and shared by federal agencies frequently does not fulfill the criteria to be classified as nuclear or national security information, it nevertheless needs to be protected from illegal access and disclosure.

According to and in accordance with legislation, regulation, or general government policy, protection is necessary for reasons of privacy, law enforcement, or other considerations. In the past, the Executive Branch had a patchwork of markings since each agency had its own procedures for handling critical unclassified material. This led to confusion among branch employees.

On September 14, 2016, ISOO released the Title 32 Part 2002 (CUI) Code of Federal Regulations (CFR) Final Rule. The "Implementing Guidance" for the CUI Program was contained in this Final Rule. However the registry is important but **what is the purpose of the isoo cui registry** ?, keep on reading to find out the purpose.

On March 6, 2020, DOD Instruction (DODI) 5200.48, Controlled Unclassified Information, was published by the Office of the Under Secretary of Defense for Intelligence and Security (OUSD (I&S)). This order provides policy for CUI across DOD, assigns duties, and specifies processes in accordance with (IAW):

- E.O. 13556;
- Part 2002 of Title 32 CFR (Final Rule) and Sections 252.204 to 252.209 of the Defense Federal Acquisition Regulation Supplement (DFARS)
- 7008 and 252.204-7012.

The Purpose of The ISOO CUI Registry

The Information Security Oversight Office (ISOO) maintains the ISOO CUI Registry (Issoo.gov), which is the definitive source of Controlled Unclassified Information (CUI) about US Government systems and procedures (ISOO).

The registry offers the guidelines and open access required to make it easier to implement CUI compliance requirements across a range of US government systems, programs, and activities. The registry ensures that information is appropriately labeled, stored, and distributed among authorized users by establishing, maintaining, and granting public access to CUI. These are the main purposes you should know while learning about **what is the purpose of the isoo cui registry**.
