Tractor Gyan

A tractor is a powerful agricultural machine designed to perform a wide range of farming tasks with efficiency and ease. Built with a strong engine and rugged design, tractors are used for ploughing, tilling, sowing, harvesting, and hauling heavy loads. Modern tractors come equipped with advanced features such as hydraulic lifting, power steering, PTO (Power Take-Off), and fuel-efficient engines, making them essential for both small-scale and commercial farming.

The Sonalika 60 is a high-powered tractor with a 60 HP engine, perfect for heavy farm jobs. Its strong engine and good torque help with sowing, harvesting, and hauling. Known for lasting long and needing little upkeep, it also features advanced hydraulics and a smooth gear shift for better control in the field.

The Sonalika 60 is a powerful 60 HP tractor that is renowned for its exceptional fuel efficiency and ability to handle heavy tasks. In a similar vein, the John Deere 5050 and John Deere 5405 blend Indian farming requirements with American technology. While the 5405 delivers more horsepower and sophisticated hydraulics for commercial-scale farming, the 5050 is ideal for medium-sized farms.
